PROFILE

MERN Stack developer skilled in building scalable web applications with MongoDB, Express.js, React.js and Node.js. Focused on modern JavaScript frameworks, Restful APIs, and Cloud deployment. Passionate about clean code, best practices, and enhancing user experience. Experienced in Agile environments and cross – functional collaboration.

PROJECTS & EXPERIENCE

GAMER PULSE (E- Commerce Website)
Technical Project

- Developed a sleek and responsive e – commerce website specializing in high- performance gaming laptops.
- Features: Gaming laptop listings with detailed specifications, shopping cart, and a user-friendly interface.
- Frontend Development: Built using HTML, CSS and JavaScript for responsive and interactive UI.

NETFLIX CLONE (React.js)

- Developed a fully responsive Netflix clone application using React.js, providing a seamless streaming interface
- Integrated TMDB API to fetch and display movies and TV shows for various categories.

FOOD DELIVERY WEB APP (MERN Stack- Aesthetix Edu Tech)

- Implemented user authentication, food menus, and real time cart updates.
- Created responsive UI with React and managed global state using Context API/ Redux.
- Built RESTful APIs for user management, order processing, and product listing.
- Time Taken: 5 weeks, Team size: 2
- Technologies used: MongoDB, Express.js, React.js, Node.js and HTML
